**Quality & Efficiency**

TMD Group's Vision is to become a leading supplier of bearing components and other high-precision steel components for Automotive applications in the European market, by providing complete service and products with highest knowledge standards and quality to its Customers.

Mission of TMD Group is constantly facing new challenges, focusing on production activities and providing services which fully satisfy the requests of our customers, integrating the efforts and commitment of all employees, managers, suppliers, stockholders and all along following environmental standards, standards of protection and safety of employees with a constant attention to efficient energy consumption.

Flange ,  
Pulley,  
Toothring,  
Stafex,  
Innerring for bearing/outerring for bearing,  
Rollers,  
Rotor,  
Tube components

Forging:  
Hot forging in closed die  
Hot forging in rolled mill  
Cold forging

Heat treatment:  
Annealing furnaces  
Hardening furnaces  
Inductive hardening

Machining:  
Cutting with circular saw  
Turning horizontal and vertical  
Sawing (band and circular)  
Machining center (drilling, milling and tapping)  
Punching / Perforation  
Gear shaping  
Grinding (face and outside diameter)
